WHO WE ARE

CONTROL EQUIPMENT PTY LTD supply a full range of manufactures' portable and fixed instruments and specialise in providing innovative and reliable products along with expert service & calibration for a wide variety of applications.

Recognised as an industry leading company, backed by our direct and long-term relationships with our key suppliers, we are the first stop shop for many companies' gas detection instrumentation requirements. We customise many units on site, calibrate prior to dispatch, provide certificates with each shipment and have full service capability to support instruments either at your site or in our laboratory.

CONTROL EQUIPMENT PTY LTD is an Australian company that has been supplying and servicing gas detection instrumentation since 1977. We are able to handle supply and service contracts of varying sizes to assist major and minor projects to meet their demands for suitable gas detection systems. We are able to supply and service gas detection equipment that are adhere to any size order big or small.

CONTROL EQUIPMENT PTY LTD is the exclusive agent for **Riken Keiki Co., Ltd., RKI Instruments, Otis Instruments Inc, and Pergam-Italia S.R.L.** and an authorised agent for **Casella and Testo** in Australia, with Riken Keiki is the inventor of the modern gas detector used in today's market.

We keep your employees and facilities safe from the dangers that cannot be seen or naturally detected

OUR VALUES & VISION

CONTROL EQUIPMENT PTY LTD seeks to be characterised by our passion, integrity, and our innovative spirit, as we continually strive to fulfil our vision. These values guide us in all that we do and are the foundation upon which our organisation is built.

Our vision is to provide our clients with highly professional and efficient services, that are the most cost-effective solution for the specified requirements. We drive our leadership with a total commitment to providing effective long-term solutions for our customers.

QUALITY

We source the highest level of quality instruments and offer complete factory support and are proud of our reputation earned over a long period of association with our customers. Our commitment is to guarantee the highest standard of service to our customers under the uncompromising banner of quality:

Quality Instrumentation - Quality Service - Quality Support

Our sales and service engineers assess the requirements of the individual customer before a solution is offered. In the interest of both customer satisfaction and occupational health and safety, we believe that there is only ever one solution for each application – the correct solution. As a result, we have a reputation of going to extraordinary lengths to ensure the instrumentation offered will fulfil all requirements of the specific application.

CALIBRATION GAS & EQUIPMENT

We provide innovative state of the art equipment for the monitoring and detection of gases in any application you can conceive. Our capability for Australia and Pacific wide supply includes supply of a wide variety of instrumentation (personal devices, fixed sensors and controllers for a multitude of applications) and, provision of calibration, repair and maintenance with both a laboratory and on-site servicing capability. Our Field Support Technicians, are able to provide services Australia wide with a 24 / 7 call out availability and we will provide service reports for all equipment within 72 business hours.

Our laboratory has state-of-the-art equipment to ensure accurate and timely work is carried out. **CONTROL EQUIPMENT PTY LTD** provide a typical turnaround time of between one to two days for any equipment supplied from all over Australasia and the Greater Pacific region.

We use NATA traceable calibration gases for all our servicing and calibration needs and can handle all makes and models of gas detectors. We also provide a wide range of portable detection units for hire.

Our product expert technicians are factory trained by our key suppliers to provide you with the best local expertise and confidence in our ability to solve the many difficult issues that can arise in a gas detection system design.

All our equipment is backed by a manufacturer's warranty for service and technical support. We will also provide quotations for any repairs of a significant nature prior to any work being carried out. In addition to our great equipment, service and technical support, we also offer the ability for you to hire equipment, as well as provide a trade in program for an upgrade with each purchase of a new generation device, and the safe recycling / disposal for the components of any returned instruments.
